

Marine COLLAGEN TRIPEPTIDE

ESSENTIAL COLLAGEN AMINO ACID SEQUENCE™

TRIPEPTIDE GUIDE

Rejuvenate Ageing Skin

Beyond Beauty

Tripeptide is
the **Bioactive**
component of
all collagen powders

The Primary aim of collagen peptide powder supplementation is for the bioactive component to reach the target tissue site intact to stimulate collagen production.

Bioavailability - enzymatic stability and intestinal permeability.

Bioactivity - Stimulating the endogenous synthesis of collagen.

What is a Tripeptide?

A Tripeptide –

1. – is a collagen **building block**, unique and **specific** to collagen fibres.
2. – is one of the most significant collagen peptides to **reach the target tissue intact**.
3. – is an amino acid structure made up of **three amino acids**, typically **Glycine-X-Y** where X and Y most commonly include proline, hydroxyproline and alanine..
4. – has a **low molecular** weight of 300Da.
5. – has a high **bioavailability**.
6. – reaches the **target tissue intact**, due to the **enzymatic stability** and **intestinal permeability** of Gly-Pro-Hyp and Pro-Hyp.
7. – has a **superior bioactivity**.
8. – reaches the **target tissue site** intact **stimulating fibroblast** and **collagen synthesis**.

Tripeptide is the **Essential Collagen Amino Acid** **Sequence**

What makes Tripeptide Special?

Collagen Tripeptide, the essential amino acid sequence, a structure unique and specific to collagen. It has superior bioavailability due to its small molecular weight, its **enzymatic stability** and **intestinal permeability**. It reaches the target-tissue site intact and stimulates fibroblast proliferation for optimal collagen synthesis.

Marine Collagen Tripeptide

High Bioavailability & Superior Bioactivity

Marine Collagen Peptide Standardized to 15% Tripeptides

**Morikol® the registered trademark of DolCas Biotech, LLC USA

Morikol® is the brand name for a uniquely prepared marine collagen tripeptide compound and is a registered trademark of Dolcas Biotech, LLC.

Morikol® consists of marine collagen peptides with a very low molecular weight and is Standardized at 15% Tripeptides with a molecular weight of 300 Da.

The tripeptides, as uniquely prepared in Morikol®, have been clinically demonstrated to enhance skin and joint health at relatively low dosages.

Morikol's exceptionally low molecular weight ensures optimal bioavailability and superior bioactivity at the target-tissue site, stimulating the **endogenous** production of collagen.

Endogenous meaning "produced or synthesized within the organism or system".

Value Benefits

Protect | Stimulate | Renew | Reduce

Protects your skin against harmful UV Rays

Stimulates collagen fibre production

Renew skin elasticity, firmness & hydration

Reduces appearance of fine lines and wrinkles

Sontal Marine TRIPEPTIDE 60 VegeCapsules contain patented ****Morikol®** Marine Collagen Peptides, providing more than >15% CTP equal to 150 mg of unique **Collagen Tripeptide** per dosage of two capsules per day.

Order Information

Product Code: SON060CTP

GTIN Barcode: 6009801689517

Pack Size: 60 Capsules

**Morikol® the registered trademark of
DolCas Biotech, LLC USA

PROPRIETARY NAME (AND DOSAGE FORM)

SONTAL Marine COLLAGEN Tripeptide CAPSULES

Pack Size 60 Vegetable Capsules 

Each capsule contains 500 mg of

Morikol® Marine (fish) Collagen,

Standardized to 15% **Tripeptide**,

= 150 mg / 2 x capsule dose.

Contains No Excipients or additives.

Sugar-free.

Contains fish protein.

Halal Certified Ingredients

Dosage and Directions for Use

2 x Vegetable Capsule 500 mg = 1 000 mg/
dose.

Adults take 2 x vegetable capsules in the mornings on an empty stomach. Take the capsules with a sufficient quantity of liquid.

Value Benefits

Protect | **Stimulate** | **Renew** | **Reduce**

Protects your skin against harmful UV Rays

Stimulates collagen fibre production

Renew skin elasticity, firmness & hydration

Reduces appearance of fine lines and wrinkles

Benefits of TRIPEPTIDE Collagen

The benefits associated with the consistent use of Sontal Marine Collagen Tripeptide Capsules.

Skin UV **PROTECTION**

Skin **HYDRATION**

Skin **ELASTICITY**

Strong **HAIR**

Skin **LIFT**

Skin **SMOOTHNESS**

Healthy **NAILS**

Protection against premature photoaging of the skin.

Protection against the harmful UV rays from the sun by reducing the production of collagen digestive enzymes.

Primary Benefits

Promotes healthy skin

Protects skin from oxidative stress

Minimizes wrinkles and fine lines

Improves skin hydration

Reduces skin roughness

Skin UV **PROTECTION**

Collagen Tripeptide, the essential amino acid sequence, helps protect the skin by reducing the production of MMPs (collagen-digesting enzymes) produced from sun-exposed keratinocytes.

Skin **HYDRATION**

Healthier collagen fibres provide higher amount of binding points for hyaluronic acid thus increasing skin hydration. Hydrated skin looks firm and healthy.

Skin **ELASTICITY**

Collagen supplementation, especially tripeptides not only stimulates healthy collagen production through fibroblast but also stimulates production of elastin. Give your skin it's bounce back!

Strong **HAIR**

Healthy skin, healthy scalp. Collagen increases during the natural hair growth cycle ensuring strong healthy hair. Increased collagen production will have a positive effect on hair strength,

Skin **LIFT**

Healthier and stronger collagen fibres maintains and improves skin structure, therefore providing the firmness and structure of the skin, minimizing the formation of fine and course facial lines.

Skin **SMOOTHNESS**

A healthy skin with strong intact collagen fibres and elastin not only supports lift and elasticity but may also improve the smoothness of the skin.

Healthy **NAILS**

Healthy skin, healthy nail. Collagen is the structure critical for the support of the nail bed and cuticle essential for healthy nail growth.

TRiPEPTiDE

Essential Collagen Amino Acid Sequence

SONTAL® Morikol® Fish Collagen Tripeptide is quality assured and molecular size tested by an accredited third-party independent laboratory.
